

THE RANGE OF PAINTS TO DECORATE YOUR HOME

NEW RANGE OF EPOXI RESIN

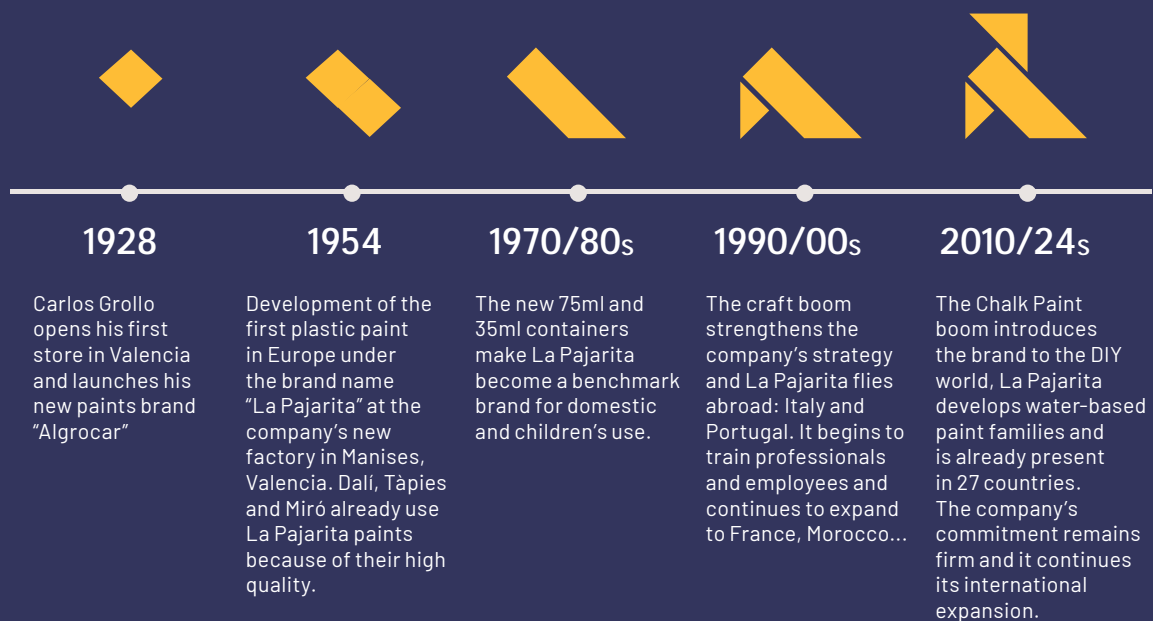

In 1928, Carlos Grollo Aloy filled the first paint bucket and started our history, the history of La Pajarita.

During these 95 years, the company has based its efforts on three pillars: quality, innovation, and creativity.

All the products included in this catalogue have been manufactured or prepared in our factory in Manises, Valencia, using raw materials of the highest quality.

Our aim is that all the references in our catalogue help to exploit the creativity of our users: from the paints that Dalí and Miró used to create their masterpieces, to the crafts our youngsters carry out or the restoration projects at home, La Pajarita always offers new solutions that meet the needs of our customers.

Get to know the wide color palette and solutions we offer on the following pages, which we have separated into the following classifications to help you find what you need:

CHALK PAINT

WATER BASED

DECORATION AND RESTORATION

Water-based paint with a chalk effect and ultra-matt finish, very easy to use, no surface preparation needed. Very opaque and highly pigmented, with good adhesion to multiple surfaces. Ideal for use in decoration of furniture and other objects as well as restoration work. Leaves no brush marks. Very resistant over time and to the damp.

Approximate yield: 20 m²/l

Surfaces: Wood, paper and cardboard, cork, plastic, textiles.

Clean: Water and soap.

CHALK PAINT OUTDOOR

DECORATION AND RESTORATION

Chalk Paint Exterior allows us to apply Chalk Paint in outdoor spaces, such as gardens, terraces, balconies... Thanks to its special formulation, the paint provides special protection for outdoor furniture and targets objects. This water-based paint is very easy to use, does not require surface preparation and provides an ultra-matt finish with a chalky effect, ideal for decoration projects or renovation of spaces and decorative elements. Very covering and with great adhesion to multiple surfaces. In addition, it is highly resistant to the passage of time and humidity.

Coverage approx.: 20 m2/l

Surfaces: Wood, paper and cardboard, cork, plastic, textiles.

Cleaning: Water and soap.

OPAQUE FABRIC PAINT

WATER BASED

CRAFTS

Paint especially designed for painting on fabrics of any color with great adhesion due to its high flexibility. This enables you to decorate and customise all types of fabric (cotton, wool, jacquard, polyester, canvas, leather, denim, etc.) and makes it perfect for fabrics, whether fine or thick, light or very dark and even black.

The color palette is very wide and the colors are miscible with each other. Wide range of bright colors, miscible with each other.

FLUOR: Fluorescent and luminous colors that brighten with black light. The best results are obtained on light-color fabrics.

METALLIZED: Bright, metallic colors with a spectacular visual effect.

INSTRUCTIONS FOR USE.

Wash the fabric first. Paint. Leave to dry and fix for 5 minutes with a hot iron without steam on the back of the drawing. Machine washable up to 40°C and dry cleanable after 72h.

Approximate yield: 10-12 m²/l

Clean: Water and soap.

TEXTILE MEDIUM WATER BASED

CRAFTS

The water-based Textile Medium turns Chalk Paint into a permanent and flexible paint for all types of fabrics. In addition to Chalk Paint, this Medium can be used to convert all types of water-based paints into fabric paint.

Create a flexible, permanent paint for fabric by mixing this medium in equal parts (1:1) with all water-based paints. For any kind of fabric. Wash the fabric first. Paint, let dry and set in the oven (150° 8'), or iron 5' without steam. Max. washing temperature 40°.

CRYSTAL GLASS COLOR

SOLVENT BASED

CRAFTS

Lacquer for painting on any non-porous surface, especially glass and crystal.

Its line includes very vivid and intense colors that can be mixed together, with a glossy and clear finish. This product should not be shaken before use, as bubbles may be produced that may affect the final result. It is recommended to first clean the piece with alcohol to remove any remaining grease or dust. In addition, if bulbs are decorated, they should not exceed 60 watts.

The painted work can also be placed in the oven at 120°-160° for 20 minutes to harden the paint.

Approximate yield: 10-12 m²/l.

Clean: Solvent.

The perfect paint for
colouring creations
made with glass finish
epoxy resin

HIGH TRANSPARENCY EPOXY RESIN

NEW

High Transparency Epoxy Resin is a colourless two-component resin (A and B) which, when mixed in the correct proportions (100 g of component A + 40 g of component B), provides a highly durable glass effect finish. Thanks to its high transparency, this resin can be built up in layers on any type of furniture or object to obtain a 3D effect.

Due to its careful formulation, it produces perfectly level, bubble-free surfaces. Its long pot life provides greater control over the mixture, allowing the user to modify the quantity or add La Pajarita Glitter, Pigments or other solid additives.

It can be applied to a multitude of surfaces, such as wood, metal, ceramics, stone, etc., providing durable, resistant surfaces which are able to withstand humidity and stain removal. It offers a tough but flexible finish that does not break under impact.

A layer of up to 5mm can be obtained, which is resistant after 4-8h and completely dry after 48-72h. Its degree of hardness further increases over the following days.

ENCAPSULATING EPOXY RESIN

NEW

Encapsulating Epoxy Resin is a colourless two-component resin (A and B) which, when mixed in the correct proportions (100 g of component A + 40 g of component B), can create encapsulation projects with a crystalline, high gloss finish. Its use is ideal for silicone moulds, jewellery or the encapsulation of small objects. Due to its dimensional stability, i.e. the encapsulated objects maintain their original shape and size over time.

Due to its careful formulation, it produces perfectly level, bubble-free surfaces. Its long pot life gives the user more control over the mixture, allowing the user to modify the amount or add La Pajarita Glitter, Pigments or other solid materials.

It can be applied to a multitude of surfaces, such as wood, ceramics, metal, etc., but its main application is being poured into silicone moulds in order to create encapsulated objects that we wish to preserve. In addition, it has a UV filter that protects it from yellowing.

HIGH THICKNESS EPOXY RESIN

NEW

THICK
LAYERS

MIXTURE
OF RESINS

HOMOGENEOUS
MIXTURE

High Thickness Epoxy Resin is a colourless two-component resin (A and B) which, when mixed in the correct proportions (100 g of component A + 30 g of component B), is ideal for large volume work and provides a crystalline, high gloss finish.

Due to its careful formulation, it produces perfectly level, bubble-free surfaces. Its long pot life provides greater control over the mixture, allowing the user to modify the quantity or add La Pajarita Glitter, Pigments or other solid additives.

It can be applied to a multitude of surfaces, such as wood, ceramics, stone, concrete, fibreglass, etc., creating durable, resistant surfaces which are able to withstand humidity and stain removal thanks to its chemical resistance. In addition, it has a UV filter that protects it from yellowing.

ACCESSORIES FOR EPOXY RESIN

NEW

ANTI-BUBBLE

Anti-Bubble Spray eliminates bubbles remaining on the epoxy resin surface after application, caused by the mixing of ingredients or during application itself.

Directions for use: spray once or twice onto the surface of the resin 20-30 min after pouring. Do not repeat the application more than twice. If a heat gun or burner is used, use anti-bubble spray afterwards.

| TRADE NAME | CAP.L. | CODE | EAN | PC. MIN. SALE |

CHALKBOARD PAINT

WATER BASED

DECORATION AND CRAFTS

La Pajarita's Chalkboard Paint makes it possible to create surfaces similar to school chalkboards, where we can paint, write or label using chalks.

Thanks to its excellent bonding and resistance, we can turn the walls of our kitchens or rooms, our fridge or office furniture, among others, into surfaces on which to write down the shopping list, play and create without limits or write down the results of a work meeting.

Approximate yield: 8-10 m²/l

Surfaces: Wood, paper and cardboard, cork, plastic, textiles, glass, porcelain, ceramics.

Clean: Water and soap.

CHALK MARKER

WATER BASED

CRAFTS

The Chalk Marker is a white liquid chalk pen that makes it possible to paint on any non-porous surface: chalkboards, glass, metal, mirrors, plastics, etc. Its main advantage is its resistance, since the ink is resistant to rain and external elements, but it can be easily erased with a damp cloth. In addition, it leaves no dust residue like conventional chalk. Rain resistant and outdoor used.

Surfaces: Canvas, wood, metal, plastic, terracotta, walls

Direct application, high resistance and easy cleaning.

GESSO RELIEVE

WATER BASED

Gesso Relieve allows you to prepare any surface by adding volume and thickness. Ideal for creating reliefs and textures on artwork, furniture or walls. It can be mixed with water-based paints to modify the colour of your finish.

RECOMMENDATIONS:

Apply Gesso Relieve and create shapes on its surface with a toothed scraper. Let dry and paint your work with chalk paint or eggshell. Highlight or change the paint finish by applying a coat of varnish.

Capacity: 4-6 m²/L

Multi surface: Wood, resin, metal, canvas, etc.

Cleaning: soap and water.

ANTI-STAIN

On certain types of wood, yellow stains sometimes appear after painting and varnishing, spoiling the finish of the work. These stains are tannins, substances that are found in the wood and penetrate the layers of paint until they reach the surface.

The Anti-Stain is specially formulated to block the appearance of tannins, as well as other types of stains that are difficult to remove, such as marker, ink, oil and grease, nicotine, and moisture.

Approximate coverage: 14-16 m²/Lt

Surfaces: Wood, especially tropical, hardwood, and coniferous types.

Dilution and cleaning: Water

CRAQUELURE VARNISH

La Pajarita's Craquelure Varnish makes it possible to achieve a cracked effect on painted surfaces. The process is very simple:

First, paint the surface with the desired base color.

Once this first coat is dry, apply the craquelure varnish on top of the surface.

Once the craquelure varnish is dry, apply the desired coat of paint to be cracked, which will crack as it dries, showing the first color applied through the cracks.

Approximate: 10-12 m²/l

FINISHES

Patinas are a very versatile water-based product used to color various types of surfaces, especially wood. To use the product as a patina, apply the product directly to the surface and allow it to dry slightly and then remove excess product with a soft cloth. If more product is to be removed, moisten the cloth with water.

On the other hand, to use the product as a dye, patina must be reduced with water in a 3(water) to 1 dye (patina) ratio. Apply directly to wood, cardboard or plaster surface; this will provide a clear color effect. These colors are miscible with each other.

Approximate yield: 10 m²/l

Clean: Water and soap.

FINE ARTS

CHROMA COLOR

WATER BASED

FINE ARTS PROJECTS

Semi-fluid vinyl colors specially formulated for artists. Chroma Color cans contain a high concentration of pure pigments that give intense and luminous shades and tones with maximum cleanliness and color quality, opaque or transparent depending on the nature of the pigment. High coverage capacity and elastic. Thanks to its vinyl composition, it can be perfectly extended during the application due to its perfect balance between resin, pigments and loads, resulting in an easy to apply ductile paint. This formula is especially valued by illustrators and sign makers. They can be used on any artistic support, on which they become permanent and stable once dry. Its 40 colors are miscible with each other and with any medium or acrylic color.

Clean: Soap and water.

- * Good degree of light resistance
- ** Very good degree of light resistance
- *** Maximum degree of light resistance
- Transparent
- Semi-transparent

CHROMA COLOR

WATER BASED

Four different color combination sets are offered with an adjustable price. They work between them with harmony as a combination color.

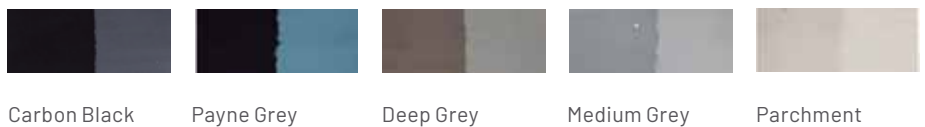

119095 PRIMARY SET

Magenta, Yellow, Cyan: pure colours, cannot be obtained by mixing colours
Black is the sum of the three primary colours and White the absence of colours.

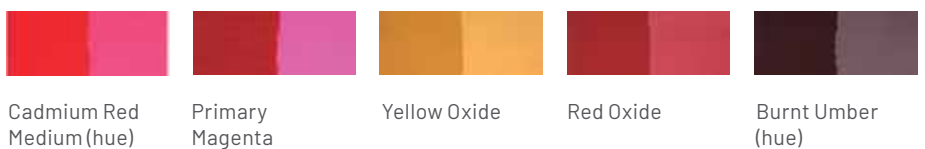

119093 GREY HUE SET

Grey or neutral shades; these shades provide balance and give stability to the work of art, they relax the eyes and allow for smooth transitions.

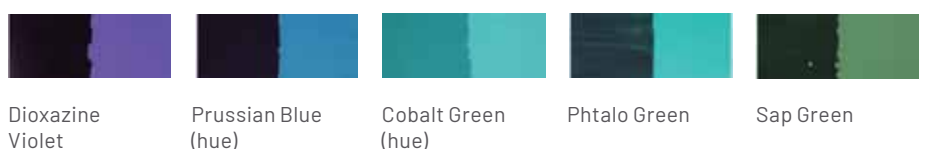

119091 WARM COLOURS SET

Shades in a harmony of colours that evoke warmth and give a feeling of moving towards the viewer. They provide a sense of closeness, activity, joy, dynamism, trust and friendship.

119092 COOL COLOURS SET

Shades in a harmony of cold colours that give a feeling of moving away from the viewer. They evoke cold and distant atmospheres, providing a sense of tranquility, seriousness and distance.

CHROMA COLOR METAL

WATER BASED

FINE ARTS PROJECTS

Semi-fluid acrylic colors with metallic shades specially formulated for artists.

Chroma Color cans contain a high concentration of pure pigments that give intense and luminous shades and tones with maximum cleanliness and color quality, opaque or transparent depending on the nature of the pigment.

High coverage capacity and elastic, with great extensibility, they can be used on any artistic support, on which they become permanent and stable once dry.

Approximate yield: 10 m²/l

Clean: Soap and water.

ACRYLIC PASTES & MEDIUMS

WATER BASED

FINE ARTS PROJECTS

Specific products to use mixed with paint or without mixing. They allow create different mix techniques (MIXED MEDIA) like textures, collages, scrapbooking techniques, etc. Different transparent gels don't modify paint hue. They add consistence and brightness. White pastes change paint texture to create effects and surprising volumes. Gessos prepare surfaces to be painted.

ADHESIVE PASTE

It can be mixed with pigments to create paints, or mixed with paint to add volume and strength.

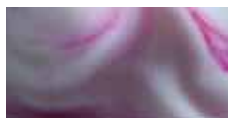

GESSO ARTIST

Universal primer acrylic polymer based with high titanium dioxide. Ready to use and ideal for background preparation. It guarantee higher length to art works.

LATEX BINDER

It can be mixed with pigments to create paint or it can be mixed with paint to give it volume and resistance.

TEXTURED MEDIUM GEL

Transparent gel with micro-spheres that allow obtain thin texture surface, porous and volume finish.

GESSO STUDIO

Very fluid gesso easy to use. Ideal for background preparation, perfect base for any paint technique.

MEDIUM GEL

75ml/250 ml/500 ml/1l. Transparent glossy gel to obtain volume or relief finish. It increases viscosity and no modifies color hue.

EXTRA THICK GESSO

High density acrylic primer that gives thick and volume to art works.

MODELING STUCCO

250 ml/500 ml. Acrylic polymer emulsion-based paste with opaque matt finish. It doesn't contain pigments, so it allows keep hue when it is mixed with water-based paint or pigments.

THICK SANDSTONE PASTE

Acrylic resin based paste, titanium dioxide and mineral charge that allow obtain texture surface like sand.

MATT MEDIUM GEL

250 ml/500 ml. Transparent gel with micro-spheres that allow obtain thin texture surface, porous and volume finish.

EXTRA HEAVY MATT MEDIUM GEL

Transparent acrylic gel very thick, ideal to obtain matt finish with high volume.

SANDSTONE PASTE

Acrylic resin based paste, titanium dioxide and mineral charge that allow obtain texture surface like sand. Once dry, this surface can be painted with any water-based or solvent-based paint type.

CHILDREN'S PROJECTS

Matt-finish, water-based liquid poster paints in bright colors which can be mixed with each other. Perfect for school use as they are made from non-toxic raw materials, and are easy to clean from clothing using soap and water.

They cover well and come in handy, easy-to-use plastic bottles which avoid any wastage of material. They can be applied directly to paper, card, wood, papier maché, etc. using a paintbrush or roller.

Approximate yield: 8-10 m²/l

Clean: Water and soap.

20' / 30'

DRYING

TRANSPARENT FABRIC PAINT

WATER BASED

FABRIC PAINTS

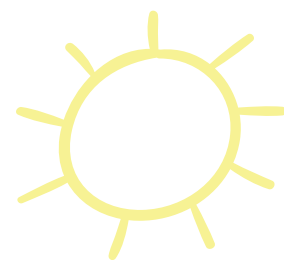

The Clear Paint for Fabric is especially aimed to painting light fabrics and textiles, although it can be used in all kinds of shades. Light textured, does not alter the flexibility and delicacy of fabrics. Their colors are luminous and miscible with each other. For painting on dark or black fabrics, we recommend a previous coat of white paint.

INSTRUCTIONS FOR USE.

Wash the fabric first. Paint. Leave to dry and fix for 5 minutes with a hot iron without steam on the back of the drawing. Machine washable up to 40°C and dry cleanable after 72h.

Approximate yield: 10 m²/l

Clean: Water and soap.

FASHION TEXTIL SPRAY

WATER BASED

CRAFTS

Water-based spray paint for fabric that is great to personalise and customise clothes and accessories in an easy, original and fun way. It can be applied directly to the fabric to design your T-shirts, pillowcases, bags and so much more. It is also perfect and fun for crafting with children. Suitable for different techniques, it is very easy to use and has perfect and original results (templates, knotting techniques, sticker resist techniques or other objects). It dries quickly and the fabric is very soft to touch.

INSTRUCTIONS FOR USE

Wash the fabric first. Paint. Leave to dry and fix for 5 minutes with a hot iron without steam on the back of the drawing. Machine washable up to 40°C and dry cleanable after 72h.

Approximate yield: 10m²/l

Clean: Soap and water.

GLASS, PLASTIC, CERAMIC & NON-POROUS WATER BASED

CRAFTS

Transparent water-based lacquer in bright, intense colors which mix easily, and are especially designed for non-porous surfaces. This coloring-based paint gives a glossy, transparent finish which is perfect for painting on glass. Do not shake the pot before use as this may cause bubbles to form. Clean the chosen surface with alcohol before painting. Once it dries, the piece can be placed in an oven at 120oC for 20 minutes to harden the paint.

Approximate yield: 10-12 m²/l.

Clean: Water and soap.

ACCESSORIES

PAINTBRUSHES

Carefully selected to use with all kinds of techniques, they are perfect for use with Chalk Paint and all kinds of paints and water-based auxiliaries. Manufactured with high quality materials, synthetic hair and wood. Its fibres are designed to paint more easily and to prevent paint drips. The paintbrushes are perfect for working on large surfaces and applying techniques such as dry brushes, shabby effects, auxiliary applications, etc.

Flat brushes are ideal for applications where paint is to be well spread in a thin, homogeneous coat. The Stencil paintbrushes are great for the stencil technique over a template, with a perfect result.

MODULAR DISPLAY

ONE DISPLAY FOR EACH POINT OF SALE

In order to adapt to each point of sale, the new exhibitors are presented in two dimensions and enable all product lines to be shown. The elements are assembled per furniture piece to form sales shelves.

* Exhibitors will be sent disassembled.

High quality and easy to use products, with the guarantee of our experience and our own careful in-house manufacture.

CARLOS GROLLO, S.A. shall not be liable for any obligation towards the customer in cases of circumstances beyond its control, even if they cannot be classified as force majeure. According to Article 18 of the Regulations under the Law on Packaging and Packaging Waste (RD 782/1998), the responsibility for the correct environmental management of industrial packaging lies with the final holder. Both parties agree to these conditions, renounce their own jurisdiction and expressly submit to the jurisdiction and competence of the courts of Valencia.
